Dr. W.F. Bodmer
Department of Genetics
Cambridge, England

Dear Dr. Bodmer:

There is indeed a housing agency -- Mrs. L. Rantz, housing office, Department of Infectious Diseases, 300 Pasteur Drive, Palo Alto, California. Write your requirements to her and she may supply you with suggestions. Something cheap, close to the Medical School, furnished and allowing young children is in short supply.

Something we know of in advance is the house the Nossais have had for about a year and a half. They will be returning to Australia via Europe beginning August 4. Due to the high costs of something furnished they bought their own equipment and have managed to get a house and garden at a fantastically low rent within five minutes drive of the Medical School.

Let him know (at his home address) if you are at all interested. It is truly a bargain.

Good luck.

Sincerely,

E.H. Lederberg
